#### DETAILED ACTION

1. No new claims were added. Claims 4, 6, 14, 21-31, and 34-38 are canceled. Claims 1, 32, and 41 are amended. Claims 1-3, 5, 7-13, 15-20, 32, 33, and 39-52 are allowed over the prior art of record.
2. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 C.F.R. 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than payment of the issue fee.
3. Authorization for this Examiner's Amendment was given by Applicant's representative Steven Koehler in a telephone call on 06/19/2009.

#### EXAMINER'S AMENDMENT

**Claim 1:** (Currently Amended) A method of processing data retrieved from a structured data source that is stored on a computer storage medium, comprising:

receiving natural language input;

analyzing the natural language input to identify semantic information contained therein;

associating portions of the natural language input with a command object identifying a command from a plurality of commands, wherein the plurality of commands are related to rendering data that has been retrieved from the structured data source and designated for rendering, a frame object identifying an arrangement for rendering data, and an entity object of a

schema based on the semantic information and the natural language input, wherein the entity object relates to the designated data that is to be rendered based on the command object and the frame object;

rendering the designated data in a plurality of candidate tables based on a plurality of candidate interpretations of semantic information provided in the natural language input, wherein each candidate table includes columns and rows based on the schema and the associated portions of the natural language input.

***Allowable Subject Matter***

4. The following is an Examiner's statement of reasons for allowance: After reviewing the Applicant's remarks and granting further consideration of the cited prior Art, it appears that the prior art fails to teach and/or suggest all the limitations of independent claims 1, 32 and 41. Specifically, the prior art of record fails to disclose "associating portions of the natural language input with a command object identifying a command from a plurality of commands; and rendering the designated data in a plurality of candidate tables based on a plurality of candidate interpretations of semantic information provided in the natural language Input, wherein each candidate table includes columns and rows based on the schema and the associated portions of the natural language input."

The preceding limitations, when combined with the rest of the claim limitations recited in claims 1 and 32 result in a combination of elements that is both novel and unobvious over the prior art of record.

With respect to claim 41, the prior art fails to disclose "associating portions of the first natural language input with a command object, a frame object and an entity object of a schema based on the semantic information and the first natural language input; receiving a second natural language input from the user referring to the table of columns and rows; altering the schema based on the second natural language input; and modifying the arrangement of the previously displayed data in the table as a function of the altered schema and displaying the newly arranged data in a modified table to the user."

The preceding limitations, when combined with the rest of the claim limitations of claim 41 result in a combination of elements that is both novel and unobvious over the prior art of record.

5. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments of Reasons for Allowance."
